

Be it Web Development, Data Science, Machine Learning, Data Engineering or any other domain, Python programming has become a key part of countless industries. Are you an aspiring Python engineer curious about the power of Python programming and its potential to revolutionize various industries with an ideal pathway towards industry-best practices, approaches and concepts to solve real world problems? We would love to hear from you by joining us for a fascinating PyCon Uganda to share your brilliant ideas and a clear understanding of this exciting field to fellow Pythonistas.

PyCon Uganda is looking for speakers of all experience levels and backgrounds to contribute to the conference program! Therefore, if you are a professional Python user, hobbyist, just passionate about Python or programming and open source communities, we would kindly love to hear from you. Wow! All speakers will be presenting their topics in person at this year's exclusive PyCon Uganda as they transform minds and growth of the Python community at large.

We are excited and humbled to receive your talk and kindly, we request you to read the following information before submitting your proposal.

Everyone is encouraged to submit a proposal regardless of their experience level. PyCon Uganda thrives on having talks ranging from introductory to advanced. If you are reading this and you are interested in speaking at PyCon Uganda, we would want you to submit a proposal.

Before writing up a proposal, read the following descriptions of the four kinds of presentations at PyCon Uganda; Talks, Tutorials, Lightning talk.

All speakers are expected to have read and adhered to the conference Code of Conduct. In particular for speakers: slide content and spoken material should be appropriate for a professional audience including people of many different backgrounds. Sexual language and imagery are not appropriate, and neither is language or imagery that denigrates or demeans people based on race, gender, religion, sexual orientation, physical appearance, disability, or body size.

TALKS

These are the traditional talk sessions given during the main conference days, through featuring a diverse and inclusive mix of speakers in the lineup. Most talks are 30 minutes long, but we do offer a limited number of 45-minute slots for important topics that promise to benefit the community.

TUTORIALS

We are looking for Python tutorials that can grow this community at any level. We aim for tutorials that will advance Python, Python community and shape the future. Each session runs for 3 full hours preceded by a break of coffee or tea. There is both a morning tutorial session on the two days preceding the main conference this year. The tutorial days are 22nd and 23rd of September, 2023 in the same venue that hosts the main conference days that follow.

Attention full-time trainers: We are also expecting educators to bring their show on the road. Therefore, we kindly request you to bring your coursework to PyCon Uganda, we would love to see what you have on the syllabus for 2023.

LIGHTNING TALK

At PyCon Uganda, we'll also be considering proposals in lightning talk format. Basically this is the shorter version of your talk of about 10 – 15 minutes. So, in case your talk proposal is not selected, you can present in the lightning talk section
